Program Mission

Providing competitive, professionally oriented university education in the field of Total Quality Management within a supportive academic environment, aimed at preparing specialists with high competitive capabilities for the labor market, and delivering research contributions and community services that contribute to the achievement of Vision 2030.

Program Goals

1. Providing a stimulating academic environment that fosters a deep understanding of principles and theories in the field of Total Quality Management.
2. Developing students' practical competencies and skills required to analyze challenges and propose innovative solutions in quality management.
3. Promoting scientific research in the field of quality management through supporting significant research studies and projects.
4. Encouraging students to apply their knowledge and skills in serving the community and improving performance in companies and institutions.

Expected Career Opportunities for Graduates

For example:

- **Quality Manager:** Responsible for developing and implementing quality strategies within the organization and ensuring the achievement of required quality standards.
- **Quality Analyst:** Analyzes existing processes and systems to identify issues and provide solutions for quality improvement.
- **Quality Consultant:** Provides advisory services to companies and organizations on the application of best practices and tools in quality management.
- **Supply Chain & Quality Manager:** Oversees and ensures the quality of materials and products within the supply chain.
- **Compliance & Audit Officer:** Monitors the implementation of quality procedures and conducts internal audits to ensure alignment with quality standards.
- **Development Manager:** Works on designing and implementing programs to improve processes and enhance production efficiency.
- **Environmental Compliance & Quality Manager:** Focuses on ensuring adherence to quality, environmental, health, and safety standards in the workplace.

And more.
